Sounds & Music

We have yet to decide which assets we prefer for sounds and music. However, we have listed below the number of assets we would ultimately need.

Given our timeline, providing a consistent and immersive game experience is crucial to the overall quality of our project. Therefore, funding will allow us to find the building blocks that we can modify to provide that polished, final feel. We are estimating for this to cost us around \$30.

SFX:

Walking, Jumping, Swinging, Shooting Web, Air Swoosh, Landing, Bite Sounds For Enemy Attack, Enemy Damage, Enemy Death, Spider Damage, Spider Death, Rushing Water, Dripping Water, Other Environment SFX, Page Flipping, Opening A Book, Closing A Book, Whisper Sounds For Narration, Dialogue

Allowable expenses include, but are not limited to: support for travel (related to project objectives) and supplies, salary for undergraduate or graduate research principle investigators, equipment, makerspace materials, and service fees.

Non-allowable expenses include: food, beverages, memberships, international conference travel.
